EXPERIENCE

Web Developer Intern – 6 Months

- Engineered a custom desktop Point of Sale (POS) system using **React**, **NodeJS** concepts, **LokiJS** (MongoDB query principles), **TailwindCSS**, and **ElectronJS**.
- Developed and customized business websites using **WordPress**.
- Integrated invoice PDF generation, automated local data management, and offline-first capabilities.

Freelancer | Web Developer – 2025 – Present

- Designed and deployed client-facing websites using React, Tailwind CSS, and Vite.
- Implemented routing, responsive design, and deployment workflows.

PROJECTS

Capstone Project | E-commerce Website – MERN stack — Full-stack platform featuring JWT authentication, Stripe payments, product reviews, cart management, password recovery, toast notifications (Toastify), and admin dashboard.

3D Portfolio – React + Three.js — Interactive and animated developer portfolio site.

Studio Website – gobistudio.pages.dev — Built using React, Tailwind CSS, and Spline 3D for a creative studio client.

Personal Portfolio – sanjith.vercel.app — Features dark/light mode toggle and EmailJS-based contact form.

Java + SQL Game Suite – Desktop application suite with login, game logic, and score tracking.

Mini C# Projects – Collection of utilities demonstrating problem-solving using C#.
